Unit 9 67 - 71 Vicars Street Mitchell ACT 2911

Description

Move your fishing to a high level with force. The Force trolling motor is the most powerful and most efficient 57" freshwater trolling motor available. Wireless chartplotter connectivity provides navigation, autopilot and anchor lock features. Use the precise anchor lock to hold your boat in the same location while you fish. Force includes a convenient wireless foot pedal that provides instant control and responsiveness yet feels and steers like a cable-steered pedal. See more fish and structure clearly integrated Ultra High-Definition scanning sonar. It also includes a handheld remote control with a built-in sunlight-readable display. The remote gives you complete control of the trolling motor and simple point-and-go gesture steering.

You get the best of all three. The powerful Force trolling motor has the power to move you from spot to spot more quickly and stand up better to winds and currents. Even with all that power, it is also the most efficient trolling motor available so you can count on it to fish all day. And it is still whisper quiet. Its high-efficiency brushless motor operates at either 36 V or 24 V, it delivers comparable thrust to our competitors' 36 V motors. The most powerful, most efficient and quiet trolling motor - its everything you could want in a trolling motor.

Chartplotter Integration:

- Simple integration with your Garmin chartplotter via a wireless connection makes using the built-in autopilot easy. Create routes to your favourite waypoint, and follow tracks while you fish.
 - The Force trolling motor comes with an integrated transducer with CHIRP traditional and Ultra High-Definition ClearVu and SideVu scanning sonars with imperceptible sonar noise interference.
