Unit 9 67 - 71 Vicars Street Mitchell ACT 2911

Description

The new High Thrust T25 delivers the power and grip to manoeuvre heavier small vessels with exceptional efficiency. Based on the award winning F25, Yamaha developed the new T25 in response to requests for lightweight electronic fuel injected performance in a small, high-thrust configuration. The new T25 benefits from the technology and features available on the standard F25 model, including an exceptional power-to-weight ratio, variable trolling rpm control and the ability to connect to Yamaha's Command Link Digital Gauges. This T25 comes fitted with a dual thrust propeller, specifically tested and developed for this outboard. These big-diameter, low-pitch propellers offer exceptional thrust and efficiency for pushing big loads in both forward and reverse.
